## PROJECTS

### ● Photography Website

- A platform for photographers to upload their work on portal for global distribution.
- The platform also provided photographers to buy, rent or sell their photography equipment on the portal.
- The portal allows photographers from all kinds of genres to upload their work on the platform to distribute it for free to use / monetize it.
- The administrator handles all kinds of transactions including the buy, rent and sell portal, an each photographer's choice of free to use or purpose of monetization on each photograph uploaded.

### ● Spotify Clone

- This is the music streaming platform that helps us to gain advantages well-paid streaming industry.
- This music player will have all the features like where the users can add, play, pause, and seek the songs that been added.
- This music player is build using Html, Css, Javascript.

### ● Portfolio Website

- This website is about personal / resume website which includes details of a person.
- This also provides the information about what a person will do, what service you may offer, and how to contact you or your company.
- And also in this the contact form is connected with google sheet where we can receive the contact from inquiries.
